

PRE5709 7-Day Programmable Din Mounted Timer

Prefect Product File

Key features.

- 7-Day programmable Economy times
- Timed or permanent override features
- Electrical Loading - 16Amp resistive 230Volts 50Hz

This simple to use programmable din mounted timer has been designed to provide a high level of control and accuracy as well as the last word in convenience.

The secure electronic clock is housed in a protective ABS enclosure which is normally mounted on the Din rail of the heating distribution unit. The clock has rechargeable battery back up ensuring program times are not lost should mains power be disconnected.

Seven programmable time periods are available covering all economy tariffs making the unit ideal for electric heating or water heating systems in both domestic and commercial premises.

Ideally suited for use with the Prefect ecostat range and various timers and lighting controls as a remote trigger.

Prefect Controls specialize in the automatic control of heating, lighting, and ventilation systems. We offer simple, energy efficient solutions which will save money on heating and lighting in new buildings and in existing properties. Why pay higher gas and electricity bills than you need to? **Call us to see how we could help you to cut your energy costs by up to 50%**
