- Switches loads up to 3kW (16A resistive, 10A incandescent, 6A fluorescent, 3A low energy)
- 230V AC at 50Hz
- Live, Neutral, Live output, 230VAC Live trigger connections
- Timing 0-2 hours selectable, longer times available to order.
- Fits 25mm flush box
- 4mm² Terminal capacity

The PRE9250 is a sophisticated yet very simple to use, push operated time delay switch, ideal for controlling heaters, lighting or ventilation equipment in areas that are used only intermittently and for short periods – such as stockrooms or corridors.

The delay timer is an extremely versatile unit that provides a programmable run-back time for a 2 hour burst of heating, or run a fan - or a light - for only 10 minutes.

Prefect Controls specialize in the automatic control of heating, lighting, and ventilation systems. We offer simple, energy efficient solutions which will save money on heating and lighting in new buildings and in existing properties. Why pay higher gas and electricity bills than you need to? **Call us to see how we could help you to cut your energy costs by up to 50%**
