

## PRE9276TXRX RF Wireless Three Stage Tamper Proof Hob Run Timer

Prefect Product File

### Key features.

- Rating at 230V AC 16A heating load
- Live, Neutral x2, Normally open, Common
- Lvd and Emc compliant
- Timing range: 1-999 minutes
- Tamper proof remote programming by "IR" handset - PRE5901
- 8 to 10 Years battery cell life
- AN10 Wireless connectivity
- Pair multiple receivers to one transmitter
- 999 Selectable local codes and 999 building codes eliminates cross talk between units in close proximity.

The PRE9276TXRX Hob run timer provides a simple alternative to the traditional hob timer. Advanced radio frequency protocols have been developed allowing the timer to "talk" to its receiver without the need for wires, allowing the control head to be fitted in a convenient location in the kitchen, and allows for remote switching of the hob and cooker supply at the consumer unit rather than directly at the cooking point.

The PRE9276TX features all new battery saving technology allowing the unit to achieve 8 to 10 years of operation before requiring a replacement cell.

Ideal for accommodation blocks the AN10 protocol allows multiple units to be installed in close proximity to each other without the risk of interference.

Prefect Controls specialize in the automatic control of heating, lighting, and ventilation systems. We offer simple, energy efficient solutions which will save money on heating and lighting in new buildings and in existing properties. Why pay higher gas and electricity bills than you need to? **Call us to see how we could help you to cut your energy costs by up to 50%**
