

# PRE5001 Touch Activated Three-Stage Thermostat with User Adjustment

# Prefect

Prefect Product File

## Key features.

- Rating (at 250vAC) 16A heating load
- Temperature Range – Set-back level 5-19°C; Boost level 16-30°C Frost -5°C
- User adjustment knob (within pre-set bands)
- Temperature accuracy to +/- 0.5 C
- Time setting: 0-3 hours
- Lvd and Emc Compliant
- Other temperature ranges and timing available to special order

This 'mid-range' Touch activated thermostat offers the optimum in convenient control.

Featuring the same automatic triple-temperature sensor as the popular PRE5003 unit, this model offers the additional facility of user adjustment by a rotary knob on the fascia allowing the user to raise or lower temperatures within carefully set limits so that each person has final control over their own heating level. By ensuring accurate control over room heating, the unit optimises energy usage whilst maintaining comfortable temperatures automatically.

Ideally suited to controlling panel heaters or wet radiators in student residences, hotels, and holiday homes.

The PRE5001 offers three temperature levels – 'set-back' maintains an economical background heat; a higher boost heat is available at the touch of a button, and if no activation is detected for 48 hours, the temperature is allowed to fall to a 5°C frost-protection setting. A further touch on the fascia re-activates the unit into the comfort / set-back routine.

Prefect Controls specialise in the automatic control of heating, lighting, and ventilation systems. We offer simple, energy efficient solutions which will save money on heating and lighting in new buildings and in existing properties. Why pay higher gas and electricity bills than you need to? **Call us to see how we could help you to cut your energy costs by up to 50%**
