

PRE5104 PIR Activated Three-Stage Thermostat

Prefect

Prefect Product File

Key features.

- Rating (at 250v AC) 16a heating load
- Temperature Range: setback level 1 - 20°C; Boost level 15 - 30°C Frost 1 - 20°C
- Temperature accuracy: + / - 0.5°C
- Time setting: 5 - 480 mins, Time to frost 1-72 Hours.
- IR Programmable via "IR" Handset PRE5900
- Lvd and Emc Compliant
- Available with 'reverse' operation for air conditioning applications

This convenient PIR activated electronic three-stage thermostat is one of a sophisticated range of precision electronic controls from Prefect.

Ensuring economic energy usage – automatically, the PIR senses when the room is occupied and keeps the temperature comfortable, whilst allowing it to fall slightly to a background level if the room is vacant. If no presence is detected for 48 hours

the temperature is allowed to fall to an economical 5°C frost-protection setting. Once the PIR has detected again the unit is re-activated into the comfort / set-back routine.

Most convenient of all, the PRE5104 boasts the latest in secure time / temperature programming through a simple to use "IR" handset allowing rapid input of time / temperature profiles "in situ". These features make the PRE5104 the most convenient and versatile PIR control available anywhere.

Prefect Controls specialise in the automatic control of heating, lighting, and ventilation systems. We offer simple, energy efficient solutions which will save money on heating and lighting in new buildings and in existing properties. Why pay higher gas and electricity bills than you need to? **Call us to see how we could help you to cut your energy costs by up to 50%**
