

PRE5200 Two-Stage PIR Activated Thermostat (with User Adjustment)

Key features.

- Rating (at 250vAC) 16A heating load
- Temperature Range – Set-back level 5-19°C; Boost level 16-25°C
- User adjustment knob (within pre-set bands)
- Temperature accuracy: 1°C
- Time setting: 0-2 hours
- Lvd and Emc Compliant
- Other temperature ranges and timing available to special order
- Available with 'reverse' operation for air conditioning applications

This 'top of the range' PIR activated thermostat offers the optimum in convenient control.

Featuring the same automatic dual-temperature sensor as the popular PRE5100 unit, this model offers the additional facility of user adjustment by a rotary knob on the fascia. This allows the user to raise or lower temperatures within carefully set limits so that each person has final control over their own heating level.

The same automatic sensor varying temperature according to occupancy in the room makes the PRE5200 the best choice in the Prefect range of PIR controls. Hotels, luxury offices and almost anywhere that individual temperature control is needed are ideal for this unit.

Prefect Controls specialise in the automatic control of heating, lighting, and ventilation systems. We offer simple, energy efficient solutions which will save money on heating and lighting in new buildings and in existing properties. Why pay higher gas and electricity bills than you need to? **Call us to see how we could help you to cut your energy costs by up to 50%**
