- Boost level 15-30°C & Frost protection 1- 20°C (Settable with PRE5900)
- Temperature accuracy: + / - 0.5°C
- Time setting: 0 - 2 hours adjustable - other temperature and timing ranges available to special order.
- Lvd and Emc Compliant
- 1-72 Hours (Settable with PRE5900)
- Available with 'reverse' operation for air conditioning applications
- Remote Programming by "IR" handset - PRE5900

This remotely activated comfort / set-back thermostat enables any suitable 'trigger' to act as the user control - say a door entry switch, central time clock or a presence detector.

Ideally suited to controlling electric panel heaters or wet radiators in hotels, holiday homes, student residences, or nurses' homes, the PRE5502 controls room heating within pre-set parameters, guaranteeing comfortable temperatures, yet safeguarding economic operating costs - a lower heat level is set to give background temperature, whilst the 'trigger' automatically selects comfort level only when areas are occupied.

Prefect Controls specialise in the automatic control of heating, lighting, and ventilation systems. We offer simple, energy efficient solutions which will save money on heating and lighting in new buildings and in existing properties. Why pay higher gas and electricity bills than you need to? **Call us to see how we could help you to cut your energy costs by up to 50%**
