

PRE9030F Relay Module

PRE9030F Relay Module schematic wiring diagram

30 amps at 230 Volts
Do not exceed the recommended rating

The PRE9030F Relay Module is designed for use with thermostats and other control equipment where the electrical rating is below the electrical load to be connected. This simple to install unit is capable of switching 30 amps of resistive Load such as Electric Panel Heaters or Air conditioning units.

Size: L:190 x H:140 x D:80 mm
 Electrical spec: 220-240VAC50Hz
 Load: 30A resistive
 Connections: Live, Neutral, NO Contacts
 Conformance: EMC- 89/336/EEC LVD - 73/23/EEC CE approved
